Summary

A passionate 20-year-old third-year IT student specializing in Back-end Development and Network Security. Dedicated to mastering .NET technologies, I am currently expanding my expertise in modern frameworks, clean code practices, and scalable architecture design, aiming to build efficient and robust server-side applications.

Education

Bachelor's degree in information technology Egyptian E-Learning University, Asyut, Egypt Expected Graduation: 2026 Current Status: Third-Year Student

- **Skills**
